

Data Sheet

Mobile Bullet Trap

SKU : STS333

This is currently the BEST, SAFEST and MOST INEXPENSIVE Mobile Bullet Trap option for full auto and .50 BMG.

It is made from steel for exceptional durability, and includes a ballistic rubber panel positioned in front of the steel cage that will entrap most pellets and slow down or deflect the other calibers enough to be then stopped within the inside rubberized medium. As an extra precaution the back panel of the cage is made of AR500 armor steel that will stop pretty much anything that might penetrate the inside medium. The ballistic rubber front panel and the rubberized medium inside the cage ensures that NO lead dust will be generated due to impact or very minimal as well as NO noise due to impact. In case of impact, which could happen if the inside rubberized medium is worn out, the impact will be very much reduced.

Key Features

- Specifically designed for full auto and .50 BMG
- Includes 1" ballistic rubber front panel, with self-healing properties
- No LEAD dust and NO noise (or very minimal)
- Steel construction with AR500 armor steel backplate
- Dimensions: 3 FT x 3 FT target area, 3 FT long cage
- This mobile bullet trap weighs about 141Kg (~ 310LB)

Specifications

- Compatible caliber : For full auto and .50 BMG
- Material: Heavy-duty steel and ballistic rubber block
- Weight: 141Kg (~ 310LB)
- Steel Trap Dimensions: 3 ft
- Rubber Block Dimensions: 3 x 3 ft
