

## Data Sheet

# Wireless Target Monitoring System - 1000 Yards

SKU : TMS-1000YD

This camera system will be capable to capture target images from up to 1000 yards in open field with no obstructions. We were able to have clear images in some settings in a completely open field from up to 1100 yards. Our NEW tripod version system is a TRUE Plug & Play version and it works out of the box with no setup required. It has been designed for quick deployment in the field. The single tripod system allows easy positioning of the camera in any shooting situation. The display comes with its own stand that can be also wall mounted.
